

Orero vCard HTML Template

Maxdp

First of all, thank you for purchasing my template! You rock! This documentation should cover all the details you need to know about this template. If you need further assistance please email me via my profile page on [ThemeForest](#)

Features

Orero is a unique vCard One Page Responsive Portfolio Theme designed for your personal and professional use. It uses Bootstrap framework to make it responsive across your devices. Orero comes with 10 theme colors to choose from.

Features List

- Responsive Design
- Built with Bootstrap 3.1.1
- Layer Slider(Save \$10)
- One Page Design
- 10 Theme Colors
- 12 pre-defined patterns
- Font Awesome Icons
- Working Contact Form with validation
- Unlimited Colors
- Animations
- Animate any element
- Customizable Navigation
- Call To Action
- Parallax
- About Us
- Services
- Counter Up
- Personal Information
- Education
- Employment
- Skills
- Grid Portfolio
- Scroll To Top Button
- Testimonials
- Responsive Menu
- Accordion
- Accordion Toggle
- Tabs
- Clients
- Tweets

- Google Map
- Social Icons
- Touch Sliders
- Documented Code
- Documentation Included

Installing the template

After downloading the template via ThemeForest

- Unzip it to a folder
- Locate orero/html folder
- Select the method you want to upload to your web server via FTP or similar method
- Create a folder on your web server
- Copy and paste the contents of the orero/html folder to your web server folder you just created in the previous step

Main Slider

You can locate the main slider by searching for the comment block

<!-- Slider -->

As said in the Features above, Orero uses Layer Slider for the main home page slider.

There is documentation included for the Layer Slider which explains all the aspects on how to use it, add,edit remove layers, slides etc.

Social Icons

Orero comes with 13 pre-defined social icons and their colors pre-added. See the list below

Name	class
Facebook	facebook
Twitter	twitter
Google+	googleplus
YouTube	youtube
Github	github
Dribbble	dribbble
Flickr	flickr
Tumblr	tumblr
Vk	vk
Skype	skype
Pinterest	pinterest
Instagram	instagram
Linked In	linkedin

Then to add a social icon anywhere in your page you need the following code

```
<a href="#" class="social_icon {CLASS}"><i class="fa fa-facebook"></i></a>
```

Replace **{CLASS}** to one of the classes above(facebook, twitter, skype etc..) and also replace the **fa fa-facebook** to a Font Awesome Icon(see [here](#))

Navigation Menu

To edit the navigation menu locate the comment block

<!-- Main Navbar -->

Then locate the comment block

<!-- Navbar -->

To edit the menu items

To add a menu item simply add to the **ul list**

```
<li class="active">  
  <a href="#home">HOME</a>  
</li>
```

You can add the **active** class to a menu item to highlight that it's the currently selected item in the menu.

You can also delete a **li** element to remove it from the menu

To edit the logo locate **a.logo** element and change it's source to your own logo

There are 2 navbar styles available, a dark one and a light one.

To change the navbar style, locate the div. navbar_outer and add either the class **light** for the light style or **remove the light word** for the dark color.

Page Titles

To edit the page title of any page locate the comment block

<!-- Page Title -->

Simply change the value of the span element to yours and the page will have that title as a name

Call To Action

To edit the Call To Action locate the comment block

<!-- Call To Action -->

Inside the Call To Action section, you can edit the text, button URL and button text.

Parallax

Orero comes with Parallax Background Sections.

There are 5 parallax sections placed within the home page.

To find them and edit them locate the comment block

<!-- Parallax Item -->

To edit their background image, find the **div.parallax_item** and its unique class. For example tweets parallax section has the following classes:

parallax_item tweets

Then open css/style.css and locate the **.parallax_item.tweets**
.parallax_layer selector where you can change the background image.

You can also add content within the parallax item.

To add a parallax section simply add the following markup to your HTML page

```
<!-- /Parallax Item -->
<!-- Custom Parallax -->
<div class="parallax_item custom">
  <div class="parallax_layer"></div>
  <div class="overlay"></div>
  <div class="content">
    <div class="container">
      <div class="row">
        Parallax content go here.
      </div>
    </div>
  </div>
</div>
<!-- /Custom Parallax -->
<!-- /Parallax Item -->
```

Then open style.css and add the following style for your parallax block and to set the background image

```
.parallax_item.custom .parallax_layer{
  background:url("../img/myimage.jpg") 50% 0 no-repeat fixed;
  background-size: cover;
  position: absolute;
  top: 0;
  left: 0;
  right: 0;
  bottom: 0;
  z-index: -1;
  width: 100%;
  height: 100%;
}
```

Page Titles

To edit a page title locate the comment block

<!-- Page Title -->

You can then edit the icon from **span.icon** element and page name from **span.name**

About Page

To edit the About Page, locate the comment block

<!-- About Page -->

To edit the User Picture locate the comment block

<!-- User Picture -->

Within it you can change the name and picture

To edit the CV Download Button locate the comment block

<!-- CV Download Button -->

To edit the Who Am I? block locate the comment block

<!-- Who am i -->

To edit the personal information locate the comment block

<!-- Personal Info -->

Then find **div.personal_info_grid** and inside you can edit all the personal info you may want.

To edit the services locate the comment block

<!-- Services -->

Then within **div.services** add/edit or delete services items like

```
<div class="col-md-4 anim_element" data-animation="flipInY">
  <div class="item">
    <div class="row">
      <div class="col-md-12 icon anim_element" data-animation="pulse"
data-animation-delay="150">
        <span><i class="fa fa-leaf"></i></span>
```

```
        </div>
        <div class="col-md-12 details">
            <div class="title">
                <a href="#">Lorem ipsum dolor sit</a>
            </div>
            <div class="description">
                Lorem ipsum dolor sit amet, consectetur adipisicing elit,
                sed do eiusmod tempor incididunt ut labore et dolore magna aliqua.
            </div>
        </div>
    </div>
</div>
```

To edit the icon find **div.icon i** and change it to any font awesome icon

To edit the title find **div.title** and put your desired title

To edit the description find **div.description** and edit it.

Counters Section

To add counters to a section, add the following code to your desired section.

```

<div class="counters">
  <div class="item col-md-3 col-sm-3 anim_element" data-animation="flipInY"
data-animation-delay="100">
    <i class="fa fa-eye"></i>
    <div class="num">50</div>
    <div class="text">PROJECTS</div>
  </div>
  <div class="item col-md-3 col-sm-3 anim_element" data-animation="flipInY"
data-animation-delay="200">
    <i class="fa fa-gear"></i>
    <div class="num">145</div>
    <div class="text">IDEAS</div>
  </div>
  <div class="item col-md-3 col-sm-3 anim_element" data-animation="flipInY"
data-animation-delay="300">
    <i class="fa fa-cloud"></i>
    <div class="num">1650</div>
    <div class="text">HOURS OF WORK</div>
  </div>
  <div class="item col-md-3 col-sm-3 anim_element" data-animation="flipInY"
data-animation-delay="400">
    <i class="fa fa-code"></i>
    <div class="num">250</div>
    <div class="text">CLIENTS</div>
  </div>
</div>

```

Resume Page

To edit the Resume page locate the comment block

<!-- Resume Page -->

To edit the Education items locate the comment block

<!-- Education -->

Then locate **div.items** to add,edit or delete items.

To add a right aligned item use the following code

```

<div class="col-md-12 item_outer">
  <div class="row">

```

```

        <div class="col-lg-6 col-lg-offset-3 col-md-7 col-md-offset-3 col-sm-12 col-xs-12 item_outer anim_element" data-animation="fadeInLeft" data-animation-delay="100">
            <div class="item">
                <div class="date">JULY 2014</div>
                <div class="bullet"></div>
                <div class="content">
                    <div class="title">MASTERS DEGREE</div>
                    <div class="subtitle">University Name</div>
                    <div class="body">
                        Lorem ipsum dolor sit amet, consectetur adipisicing
elit, sed do eiusmod
                        tempor incididunt ut labore et dolore magna.
                    </div>
                </div>
            </div>
            <div class="clear"></div>
        </div>
    </div>
</div>

```

To add a left aligned item use the following code

```

<div class="col-md-12 item_outerx">
    <div class="row">
        <div class="col-lg-6 col-lg-pull-2 col-lg-offset-1 col-md-7 col-md-pull-2 col-md-offset-1 col-sm-12 col-xs-12 item_outer inv anim_element" data-animation="fadeInRight" data-animation-delay="200">
            <div class="item">
                <div class="date">JULY 2014</div>
                <div class="bullet"></div>
                <div class="content">
                    <div class="title">MASTERS DEGREE</div>
                    <div class="subtitle">University Name</div>
                    <div class="body">
                        Lorem ipsum dolor sit amet, consectetur adipisicing
elit, sed do eiusmod
                        tempor incididunt ut labore et dolore magna.
                    </div>
                </div>
            </div>
            <div class="clear"></div>
        </div>
    </div>
</div>

```

To edit the date locate **div.date**

To edit the title locate **div.title**

To edit the subtitle locate **div.subtitle**

To edit the body locate **div.body**

To edit the Employment items locate the comment block

<!-- Employment -->

Then the rest is the same as Employment Items above.

To edit the Skills locate the comment block

<!-- Skills -->

Then locate div.items to add,edit or delete skills items

To add a skill section the code should look like

```
<div class="skill_item">
  <div class="title"><span>DESIGN</span></div>
  <div class="skill_items charts">
    <div class="col-md-12">
      <div class="item anim_element" data-animation="fadeInLeft" data-
animation-delay="100">
        <div class="num_chart" data-bar-color="#cccccc" data-bar-
width="130" data-percent="90">
          <div class="num">90</div>
        </div>
        <div class="name">HTML5</div>
      </div>
    </div>
  </div>
</div>
```

To edit the title of the section locate the **div.title** to your desired title

Within **div.skill_items** you can add more skills like

```

<div class="skill_item">
  <div class="title"><span>DESIGN</span></div>
  <div class="skill_items charts">
    <div class="col-md-12">
      <div class="item anim_element" data-animation="fadeInLeft" data-
animation-delay="100">
        <div class="num_chart" data-bar-color="#cccccc" data-bar-
width="130" data-percent="90">
          <div class="num">90</div>
        </div>
        <div class="name">HTML5</div>
      </div>
    </div>
    <div class="col-md-12">
      <div class="item anim_element" data-animation="fadeInLeft" data-
animation-delay="200">
        <div class="num_chart" data-bar-color="#cccccc" data-bar-
width="130" data-percent="75">
          <div class="num">75</div>
        </div>
        <div class="name">CSS3</div>
      </div>
    </div>
    <div class="col-md-12">
      <div class="item anim_element" data-animation="fadeInLeft" data-
animation-delay="300">
        <div class="num_chart" data-bar-color="#cccccc" data-bar-
width="130" data-percent="50">
          <div class="num">50</div>
        </div>
        <div class="name">JQUERY</div>
      </div>
    </div>
  </div>
</div>

```

Each skill item has a percentage number and the name.

To edit the percentage number locate **span.num** to your desired number as well as edit **span.num_chart** with the percentage number

To edit the name locate **div.name** and change it to your skill name

Portfolio Page

To edit the portfolio page, locate the comment block

<!-- Portfolio Page -->

Within the Portfolio section, you can edit the page title, portfolio type selector and portfolio items.

To edit the portfolio selector, locate the following comment block

<!-- Portfolio Selector -->

And edit the unordered list to fit your categories you want to use.

Each li element must have a data-filter attribute with the category as value(as seen in demo page)

To edit the portfolio items locate the comment block

<!-- Portfolio Items -->

Within the **div. portfolio_items** container you can add your portfolio items

A simple portfolio item code should look like

```

<div class="portfolio_item mix webdesign col-md-4">
  
  <span class="overlay">
    <a href="#" class="view_portfolio_item fa fa-eye"></a>
  </span>
  <div class="popup_data">
    <div class="col-md-12">
      <div class="row">
        
      </div>
    </div>
    <div class="bottom col-md-12">
      <div class="row">
        <div class="col-md-9">
          <h2 class="section_title"><span>DESCRIPTION</span></h2>
          <div class="description">
            <p>
              Lorem ipsum dolor sit amet, consectetur
adipisicing elit, sed do eiusmod
              tempor incididunt ut labore et dolore magna
aliqua. Ut enim ad minim veniam,
              quis nostrud exercitation ullamco laboris nisi ut
aliquip ex ea commodo
              consequat. Duis aute irure dolor in reprehenderit
in voluptate velit esse
              cillum dolore eu fugiat nulla pariatur. Excepteur
sint occaecat cupidatat non
              proident, sunt in culpa qui officia deserunt
mollit anim id est laborum.
            </p>
          </div>
        </div>
        <div class="social">
          <span>SHARE PROJECT</span>
          <a href="#" class="btn fa fa-facebook"></a>
          <a href="#" class="btn fa fa-twitter"></a>
          <a href="#" class="btn fa fa-youtube"></a>
          <a href="#" class="btn fa fa-google-plus"></a>
        </div>
      </div>
    </div>
    <div class="col-md-3">
      <h2 class="section_title"><span>DETAILS</span></h2>
      <div class="details">
        <span class="name">CLIENT:</span>

```

```

        <span class="value">Envato</span>
      </div>
      <div class="details">
        <span class="name">DATE:</span>
        <span class="value">15 June 2014</span>
      </div>
      <div class="details">
        <span class="name">Website:</span>
        <span class="value"><a
href="#">http://www.example.com</a></span>
      </div>
    </div>
  </div>
</div>

```

In the **div.portfolio_item** class you should have a **mix** class name and the category that this item exists in.

To edit the portfolio image locate the **img** tag and change it to your image.

To change the content that appear upon click locate **div.popup_data** element and change the **img tag** to the image you want to display

To edit the title locate **h1.title**

To edit the description locate **div.description**

To edit the client locate **div.client**

To edit the Social buttons locate **div.social**

Testimonials

To edit the Testimonials locate the following comment block

<!-- Testimonials Parallax -->

Locate **div.testimonials** to add/edit/delete the items

Within **div.testimonial_items** you can manage your testimonials

To add a testimonial item you need the following code

```
<div class="item">
  <div class="media">
    <a class="pull-left imagediv" href="#">
      
    </a>
    <div class="media-body">
      <div class="main">
        <i class="fa fa-quote-left icon"></i>
        <span class="text">
          Lorem ipsum dolor sit amet, consectetur adipisicing elit,
sed do eiusmod
          tempor incididunt ut labore et dolore magna aliqua. Ut
enim ad minim veniam,
          quis nostrud exercitation ullamco laboris nisi.
        </span>
        <div class="clear"></div>
      </div>
      <div class="from">
        <span class="name">&mdash; JOHN DOE</span>
        <span class="company">&bull; Company Name</span>
      </div>
    </div>
  </div>
</div>
```

To edit the image locate the **img tag** and change its source to your image

To edit the name locate **span.name**

To edit the icon locate **i.icon**

To edit the text that appear locate **div.text**

To edit the company locate **span.company**

Home Page Blog Posts

To set the Home Page Blog Posts locate the comment block

<!-- Home Blog Posts -->

To add/edit/delete posts locate **div.home_blog_posts**

Each home blog post should have the following layout

```
<div class="col-md-12 post_outer">
  <div class="post">
    <div class="image">
      <a href="blog_post.html"></a>
      <span class="type"><i class="fa fa-quote-left"></i></span>
    </div>
    <div class="details">
      <h4 class="title"><a href="blog_post.html">LOREM IPSUM DOLOR SIT
AMET</a></h4>
      <div class="meta">
        <span class="date"><a href="blog_post.html">5 JUNE 2014</a>
&bull;</span>
        <span class="author">by admin &bull;</span>
        <span class="comments"><a href="blog_post.html#comments">100
comments</a></span>
      </div>
    </div>
  </div>
</div>
```

To set the post image locate **div.image** and set the image source tag to your image

To set the links to point to your blog post locate all anchor tags within the post and set them to your blog post file

To change the title locate **h4** tag and change the title to whatever you want

To change the date, author and total comments locate **div.meta**

Tweets

To set the tweets all you need to do is include the following code to your page or find the comment block

<!-- Tweets Parallax -->

```
<div class="tweets_feed"></div>
```

And open api/config.php file.

There you will need to paste the consumer key & secret and access token & secret that was given to you when you created your twitter app [here](#)

To set the username to retrieve tweets from open js/scripts.js and find

username: 'envato' and change envato to your desired username

Clients

To edit the clients section locate the comment block

<!-- Clients Parallax -->

Then within **div.client_items** you can add clients like

```
<div class="item anim_element" data-animation="flipInY" data-animation-delay="100">
  <a href="#"></a>
</div>
```

Google Map

To set the Google Map you need the following code or find the comment block

<!-- Google Map -->

```
<div id="gmap"></div>
```

Then you need to open js/scripts.js file and locate

set_center: [-37.814812, 144.963055],

and set the latitude and longitude of the location you want to display.

You can also set the map type and zoom and any other google map api configuration.

More [here](#)

Footer

To set the Footer locate the comment block

<!-- Footer -->

Contact Info

To set the contact info locate the comment block

<!-- Contact Icons -->

Within it you can set the title by changing the **div.title tag**.

To set the Text locate **div.text**

To set the icons at **span.icon**

Contact Form

To set the contact form locate the comment block

<!-- Contact Form -->

Setting the Contact Form PHP Settings

Open **ajax/ajax.php** and **on line 6** change the email address to yours.

Blog Page

To edit the Blog Page, open blog.html

Locate the comment block

<!-- Blog Posts -->

To add/edit/delete the blog posts, locate **div.blog_posts** and within it are stored all the posts with **div.post** as their class

There are 5 post types

1. Image
2. Slideshow
3. Text
4. Video

5. Quote

To add an image to an image post within the div.post add

```
<!-- Media -->
<div class="mediadata">
  <a href="blog_post.html"></a>
</div>
<!-- /Media -->
```

To add a slideshow to a slideshow post

```
<!-- Media -->
<div class="mediadata">
  <div class="post_slideshow">
    <div class="slide">
      <a href="#"></a>
    </div>
    <div class="slide">
      <a href="#"></a>
    </div>
    <div class="slide">
      <a href="#"></a>
    </div>
  </div>
</div>
<!-- /Media -->
```

To add a video to a video post

```
<!-- Media -->
<div class="mediadata">
  <iframe src="//player.vimeo.com/video/26511934" width="100%"
height="400px" frameborder="0" webkitallowfullscreen mozallowfullscreen
allowfullscreen></iframe>
</div>
```

```
<!-- /Media -->
```

To add a quote to a quote post

```
<!-- Media -->
<div class="mediadata">
  <div class="quote">
    <div class="col-md-2 icon">
      <i class="fa fa-quote-left"></i>
    </div>
    <div class="col-md-10">
      <div class="body">
        Lorem ipsum dolor sit amet, consectetur adipisicing elit, sed
do eiusmod
        tempor incididunt ut labore et dolore magna aliqua.
      </div>
      <div class="source">
        &mdash; Quote Source
      </div>
    </div>
    <div class="clear"></div>
  </div>
</div>
<!-- /Media -->
```

To set the links to point to your blog post locate all anchor tags within the post and set them to your blog post file

To set the title locate **h2.title** and change the title to whatever you want

To set the content of the post locate **div.text**

To set the date, author, post type, categories and total comments locate **div.metadata**

Sidebar

To set the Blog Sidebar, locate the comment block

<!-- Sidebar -->

To set the Search of the sidebar locate

<!-- Search -->

To set the Categories of the sidebar locate

<!-- Categories -->

To set the Tabs of the sidebar locate

<!-- Tabs -->

To set the Archives of the sidebar locate

<!-- Archives -->

To set the Text Widget locate

<!-- Text Widget -->

To set the Tags locate

<!-- Tags -->

Blog Post Page

To edit a blog post open blog_post.html file.

Find **div.blog_posts** element where within you will find the blog post

The customization is the same as documented above.

The only thing that changes are the Tags added at the bottom of the post, about author section and comments section

To set the tags locate

<!-- Tags -->

Within the tags you can add/edit/delete list items from the unordered list.

To set the About Author locate

<!-- About Author -->

Within the About Author block, you can edit the Title by locating **h3 element**

To set the avatar find the **img element** and change its src value

To set the Text locate **div.media-body** and set it to your desired text

To set the comments locate the

<!-- Comments -->

Normal Comment:

```

The blog_post.html has demo comments for you to edit and even more if you wish.

To edit the comment form locate

<!-- Comment Form -->

Animations

Orero allows you to add animations to ANY element!

Simply add the class **anim_element** to the element you want to animate and the attribute **data-animation="animation goes here"**

Orero supports all [animate.css](#) animations

You can also add delays between animations by adding to the element you want to animate the attribute **data-animation-delay="100"**

The value of the delay is in **milliseconds**

Theme Colors

Orero comes with **10** Theme Colors.

- theme_1 => Blue
- theme_2 => Red
- theme_3 => Yellow
- theme_4 => Green
- theme_5 => Purple
- theme_6 => Pink
- theme_7 => Black
- theme_8 => Carrot
- theme_9 => Dark Turquoise
- theme_10 => Dark Red

To change the theme color locate `<body>` tag and change it's class to `theme_X` where X the ID of the color from [1-10]

Theme Patterns

Orero comes with 12 pre-defined patterns which can be found in `img/patterns` folder.

To add a pattern as your background locate the `<body>` tag and add inside the style tag

```
style="background: #F2F2F2 url(img/patterns/pX.jpg);"
```

Where X is the pattern ID from [1-12]

Background Image

To set a background image locate the `<body>` tag and add inside the style tag

```
style="background: url(img/bg.jpg) center 0 no-repeat; background-size: cover; background-attachment: fixed;"
```

Buttons

To add a button simply add a link and add a class to it named `btn`

```
<a href="#" class="btn">Button</a>
```

There are 10 different button styles plus the reverse styles which add up to 20 button styles

Button Styles:

- blue
- red
- yellow
- green
- purple
- pink
- black
- carrot
- darkturquoise
- darkred

All you need to do is add one of the above classes to the button like:

```
<a href="#" class="btn green">Button</a>
```

To reverse the colors, add the class **reverse** to the button like:

```
<a href="#" class="btn reverse green">Button</a>
```

There are also 3 kind of buttons

- Small
- Medium
- Large

To make a button small simply add **small** to the button class like:

```
<a href="#" class="btn small">Button</a>
```

Medium is the normal class so there is no class for it

To make a button large add **large** at the button class like:

```
<a href="#" class="btn large">Button</a>
```
